

CIRCUMSTANCE

CAPE CORAL MOURVÈDRE ROSE 2017

IT'S REALLY ALL ABOUT THE VINEYARDS

Mourvèdre is one of the most underrated red grape wine varieties and it goes by 95 other names, including Mataró, which is used in Portugal.

It is a well-known Rosé variety used in regions such as Provence and the Rhône valley in France. Our Circumstance Cape Coral Mourvèdre is produced from grapes in the Stellenbosch wine growing region, characterised by relatively mild winters and long warm summers. The vines are cultivated under dryland conditions and planted in cool, deep red soils which provide adequate water for this late ripening variety.

A GENTLE HAND

Grapes were hand harvested followed by a gentle whole bunch pressing in our new horizontal basket press, to extract only the finest juice. No further maceration of the juice with the skins was allowed. The juice was run down via gravity into tank and left to settle naturally for 12 hours.

From there we racked the clean juice off to wooden fermenters to start the natural fermentation spontaneously, relying on wild yeasts that occur naturally in the vineyard.

The reason why we ferment in our older wooden fermenters is to ensure a slow ingress of oxygen throughout the process and therefore a longer fermentation without picking-up any oak aromas. The wine was then left on the primary lees to add further complexity before bottling.

AND A FEW PRAYERS TO MOTHER NATURE FOR THE 2016/2017 GROWING SEASON

What looked like an average harvest, due to the winter drought, turned out well, much to our surprise. This also attested yet again that Mother Nature will always keep us on our toes.

The 2016 Cape winter did not see a lot of rainfall – about half the average – and it was also not exceptionally cold. We barely saw any snow on the mountains.

Spring started early which led to an early bud burst and flowering. Thankfully we did not experience strong winds during this period, which helped with an even berry set. Seeing that we already experienced drought conditions during the berry formation stage, cell formation was also impacted to produce small cells from the start.

In January, we received a little rain which changed the game to assist the vine to grow without being too stressed. During the rest of the season we had beautiful cool evenings and mild day temperatures and this ensured a proper, even ripening process.

We started picking at the end of January and were very happy to see little to no rot; small berries with a lot of concentration, and great acids!

TASTING NOTES FROM THE GLASS OF NADIA BARNARD

Pale salmon hue. Delicate red berry aromas, with hints of floral notes are prominent on the nose. The palate is soft with a lingering fresh acidity on the aftertaste. Traditionally the wine is served chilled on its own, but also marries well with a spicy, tuna based sushi.

THE NUMBERS

Alc: 12.5% RS:2.1 TA:4.0 g/l pH: 3.49
